

ATM Security

How to keep
you and your
card safe.

Using the Automated Teller Machine (ATM) has become a part of everyday life. It's so fast and convenient. With ATM usage on the rise, it's a good idea to remind you of some common sense safety guidelines for using your ATM Card.

Protecting Your Card and Your Money

Remember: Your card is very valuable. It's the only way to get access to your account through the ATM.

- *Never write your Personal Identification Number (PIN) on or near your card. Memorize it! No one can use your card for ATM transactions without knowing the PIN.*
- *Never give your PIN to anyone and never tell it to anyone over the phone – no matter who the caller claims to be.*
- *Never give your card to anyone. It's like handing them a signed blank check!*
- *Keep your card away from heat, sunlight or anything magnetized. Also, don't let it get dirty or scratched.*

Protecting Yourself

ATMs give you 24-hour access to your money. While this means extra convenience, it also means you should take proper precaution when using the ATM after hours.

- *Be aware of your surroundings.* Most ATM locations are well lit and safe. But if the lights are out, or if you notice anyone suspicious, leave the area and find another ATM – chances are there's one nearby. Remember, there are thousands of ATM locations across the U.S., Canada and Europe.
- *Have your ATM Card and any paperwork ready before you get to the machine.* This will not only save you time, it will allow you to pay more attention to your surroundings.
- *Be sure to take your receipt.* It contains personal information, including your cardholder or account number.
- *If at a walk up ATM, stand squarely in front of the ATM.* Don't let anyone see you enter your PIN.
- *If you think your Card is lost or stolen, report it to PathFinder Bank immediately by calling 1-800-472-3272 or 315-343-0057. For a lost Visa Check Card outside the United States call 973-682-2652.*
